

## EXMAR Ship Management and Anglo-Eastern to join forces with new JV

EXMAR Ship Management (“EXMAR”) and Anglo-Eastern Univan Group (“Anglo-Eastern”) have announced the formation of a joint venture (“JV”) dedicated to the newbuilding supervision and vessel management of LNG carriers for third-party owners.

The joint venture, AEX LNG Management, brings together two of the leading names in ship management and LNG ship management, with more than 70 years of combined industry experience.

Based in Singapore, AEX LNG Management will draw on EXMAR’s niche expertise in the LNG sector, while leveraging the systems, resources and global reach of Anglo-Eastern to provide specialist services for the growing LNG carrier market. Services will include newbuilding planning and supervision, ship management, crewing and training via Anglo-Eastern’s network of strategically located maritime training centres and state-of-the-art simulators.

*“I look forward to combining EXMAR’s unique competencies in the LNG space with our crewing and training solutions in order to offer our customers a platform for LNG ship management that carries the same depth and strength as we have in our other tanker segments,”* said Peter Cremers, Executive Chairman of Anglo-Eastern.

Said Nicolas Saverys, Chairman of EXMAR Ship Management, *“I am sure that our vast LNG ship management expertise (since 1974) in combination with the global network of Anglo-Eastern will create exciting synergies that will change the third-party LNG ship management game”.*

## EXMAR Ship Management en Anglo-Eastern bundelen krachten met nieuwe JV

EXMAR Ship Management (“EXMAR”) en Anglo-Eastern Univan Group (“Anglo-Eastern”) hebben de oprichting van een joint venture (“JV”) aangekondigd die gespecialiseerd is in de supervisie van nieuwbouwschepen en scheepsmanagement van LNG-tankers voor derde partijen die eigenaar zijn.

De joint venture, AEX LNG Management, brengt twee van de bekendste namen in ship management en LNG-ship management samen, met meer dan 70 jaar aan gezamenlijke ervaring in de industrie.

Met vestiging in Singapore, zal AEX Management de aandacht vestigen op EXMAR’s niche expertise in de LNG-sector, terwijl er gebruik zal worden gemaakt van de systemen, bronnen en het wereldwijd bereik van Anglo-Eastern om specifieke diensten te kunnen leveren in de groeiende markt van LNG-tankers. Deze diensten zullen planning en supervisie van nieuwbouwschepen, ship management, bemanning en opleiding via Anglo-Easterns netwerk van strategisch gelocaliseerde maritieme trainingcentrums en de meest moderne simulators omvatten.

*“Ik kijk er naar uit om EXMAR’s unieke vaardigheden te combineren met onze oplossingen inzake bemanning en opleiding om zo onze klanten een platform te kunnen aanbieden met LNG-ship management dat even diepgaand is als onze sterkte in ander tanker segmenten,”* zei Peter Cremers, Executive Chairman van Anglo-Eastern.

Nicolas Saverys, Voorzitter van EXMAR Ship Management, zei, *“ik ben er zeker van dat onze expertise in LNG-ship management (sinds 1974) in combinatie met het globale netwerk van Anglo-Eastern boeiende samenwerkingsverbanden zal teweegbrengen die het LNG-ship management game met derden zal veranderen.”*
