PRESS RELEASE

11 March 2014

SUEZ ENVIRONNEMENT, THROUGH ITS SUBSIDIARY SENA WASTE SERVICES, WINS CONTRACT TO OPERATE THE EDMONTON WASTE MANAGEMENT CENTRE IN CANADA

SENA Waste Services, subsidiary of SUEZ ENVIRONNEMENT, has won a five-year, 54 million euro (\$75 million) contract to manage two of the largest facilities of the Edmonton Waste Management Centre, located in the province of Alberta in Canada.

Under this new agreement, SENA Waste Services will be in charge of operating and maintaining the composting facility and will provide its services for transfer and sorting activities, and for the construction and demolition site.

"This selection represents an important milestone that clearly demonstrates SENA Waste Services is well regarded by the City of Edmonton, which is one of world's most sustainable cities," says Bertrand Camus, Chief Executive Officer of SUEZ ENVIRONNEMENT NORTH AMERICA.

Held and operated by the City of Edmonton Waste Management Services, the Edmonton Waste Management Centre relies on a range of cutting-edge processes and the expertise of research. This is an exemplary and only facility of its kind in North America.

"In just over 20 years, Edmonton has travelled from a relatively simple waste management system to one of the most sophisticated in the world", explains Bud Latta, Director of waste treatment and disposal services. *"We are proud of our accomplishments and excited to partner with SENA Waste Services in bringing innovative solutions to the residents and businesses of Edmonton."*

SENA Waste Services splits the waste delivered from the transfer and sorting site into three categories:

- organic wastes that can be reclaimed as compost,
- waste that can be converted into ethanol,
- and the rest for landfilling.

The Edmonton composting centre operated and maintained by SENA Waste Services is the largest facility in Canada. The facility processes solid organic waste and biosolid materials for various uses, such as soil supplements for farming.

The special construction and demolition facility recovers wood, dry walls, asphalt shingles, concrete and metals.

Thanks to this integrated waste management system, the City of Edmonton recovers up to 60% of household waste every year, thus reducing the need for landfilling. *"Our waste diversion success is the result of effective, early strategic planning and now solid operational execution"*, asserts Bud Latta. *"SENA Waste Services has become an important part of those operations and plays a key role in our successes."*

"By making recovery a priority development focus, SUEZ ENVIRONNEMENT has gradually become a producer of renewable energy and a leader in resource management. The circular economy is at the heart of our strategy and today we bring our clients much more than waste treatment services; we offer them renewable solutions as demonstrated by the exemplary case of Edmonton", concludes Marie-Ange Debon, Deputy CEO in charge of International business at SUEZ ENVIRONNEMENT.

ABOUT SUEZ ENVIRONNEMENT

Natural resources are not infinite. Each day, SUEZ ENVIRONNEMENT (Paris: SEV, Brussels: SEVB) and its subsidiaries deal with the challenge of protecting resources by providing innovative solutions to industry and to millions of people. SUEZ ENVIRONNEMENT supplies drinking water to 92 million people, provides wastewater treatment services for 65 million people and collects the waste produced by 52 million people. SUEZ ENVIRONNEMENT has 79,550 employees and, with its presence on five continents, is a world leader exclusively dedicated to water and waste management services. SUEZ ENVIRONNEMENT generated total revenues of EUR 14.6 billion in 2013.

ABOUT SENA WASTE SERVICES

SENA Solid Waste Holdings Inc. ("SENA Waste Services"), an Alberta corporation, is a joint venture between SUEZ ENVIRONNEMENT NORTH AMERICA and AECOM, operating two major waste operation contracts in Alberta: the Edmonton Composting Facility and Swan Hills Treatment Centre. The Edmonton Composting Facility is one of the largest composting facilities in the world. The Swan Hills Treatment Centre is the only facility of its kind in Canada and plays a critical role in proper disposal of hazardous waste, such as PCBs and dioxins for the Province. SENA Waste Services is a strategic joint venture offering reliable and innovative treatment solutions for the Canadian waste market, focused on life-cycle cost optimization and long-term operation performance.
